

PROFILE

Hybrid Data Scientist & NeuroAI Researcher with 6+ years delivering production ML systems and applied neuroscience research. Built end-to-end time-series forecasting frameworks and interpretable anomaly-detection solutions; containerized deployments with FastAPI/Docker on OSS2 and Azure. Completed INRIA research internships in brain dynamics and multimodal NeuroAI, focusing on EEG/fMRI analysis, dynamic functional connectivity, and multimodal deep learning.

WORK EXPERIENCE

Marsh McLennan

2022-2024

Data Scientist

- **Built and deployed end-to-end machine learning models**, including anomaly detection systems combining supervised and unsupervised techniques, with interpretability through SHAP values and large language models.
- **Optimized model performance across key metrics** (F1-Score, Recall, Precision, Accuracy, Silhouette Score, False Positive Rate), achieving measurable improvements in anomaly detection reliability.
- **Designed and implemented scalable infrastructures with FastAPI and Docker**, ensuring deployment on OSS2 and Azure, while effectively communicating complex analyses to non-technical stakeholders for strategic decision-making.

Getin

2019-2022

Data Analyst

- **Led data-driven analysis in the retail sector**, automating reporting processes with R and Visual Basic to deliver 500+ monthly/daily reports for senior executives and decision-makers.
- **Produced and published statistical insights** on retail industry trends and performance metrics in reputable newspapers, translating complex analyses into accessible insights for non-technical audiences.
- **Designed interactive dashboards and visualizations** with Tableau, supporting ad-hoc analyses of seasonal patterns and market trends that drove actionable strategic decisions.

APPLIED RESEARCH PROJECTS

INRIA — CRONOS Team (Nice, France)

2025

Dynamical Structure-Function Correlations of fMRI Human Brain Signals under LSD

- Implemented a reproducible phase-based fMRI connectivity pipeline to study LSD effects on brain dynamics.
- Derived subject-level metrics (state occupancy, transitions, Markov entropy) and produced scientific visualizations (heatmaps, chord diagrams).
- Public code repository: [GitHub](#).

INRIA — MARIANNE Team (Nice, France)

2025-2026

Multimodal NLP for Cognitive and Emotional Insights

- Developing multimodal NLP models integrating speech, text, tone, and video to extract richer behavioral and cognitive representations.
- Focus on emotion recognition, context-aware dialogue understanding, and cross-modal fusion for NeuroAI application

LANGUAGES

- Spanish (Fluent)
- English (Fluent)
- French (Intermediate)

PERSONAL ACHIEVEMENTS

- 3x Triathlons
- 4x Half Marathons
- 3x L'Etape Cycling Race
- 2x High Mountain Summits
- 1st Marathon (On Progress)

EDUCATION

○	M.Sc. in Computational Neuroscience (in progress) 2025 Université Côte d'Azur, France Focus: Computational neuroscience, functional neuroimaging, and deep learning applied to brain and cognitive systems modeling.
○	Artificial Intelligence Professional Program 2023 Stanford University, USA Courses: Deep Multi-Task & Meta Learning, Machine Learning with Graphs, Natural Language Processing with Deep Learning.
○	Data Science & Machine Learning Program 2021 ITAM, Mexico Topics: Supervised/Unsupervised ML, Deep Learning (ANN, CNN, LSTM, RNN).
○	B.Sc. in Actuarial Science 2019 ITAM, Mexico Thesis: ARIMAX time-series modeling.

KEY SKILLS

- **Programming & Data:** Python (pandas, numpy), R, SQL, VBA, Java
- **ML & Deep Learning:** PyTorch, scikit-learn, TensorFlow, CNN, RNN, LSTM, anomaly detection, time-series forecasting, SHAP explainability
- **Deployment & MLOps:** FastAPI, Docker, DVC, Git/GitHub, CI/CD, Azure, OSS2, automated retraining pipelines
- **Visualization & BI:** Tableau, Power BI, matplotlib, Seaborn, advanced Excel (VBA automation), scientific visualizations
- **Collaboration & Communication:** cross-functional teamwork, mentoring juniors, translating technical results to strategy
- **Adaptability & Leadership:** thrive in multicultural environments, strong initiative, proven ability to align research & business needs
